

ATS— Creating a Shortcut to your phone home screen

Due to safety concerns,, risk of PHI being stored/saved on your device, ATS does not have an APP to link to your database. Although ATS does not support a downloadable app, you are able to save to your home screen a link to the correct webpage. By going to the webpage links attributed to your database, you are ensuring that the information is wiped away from your device, because that is how the webpages for ATS Staff Portal and ATS Staff Smartphone operate.

From Android Device:

Enter the URL for your specific database. Once you get there from the browser click the 3 vertical dots, click add to home screen. Title your Icon, decide your icon size and click add. Once you do that the shortcut to the browser will be saved to your home screen. You can then utilize it to take you directly to you login page.

From Apple Device:

The same basic steps as Android. Enter the webpages URL in your browser.. Once there click on the folder and arrow. That will open the action menu. Once there select Add to Home Screen.

ATS— Creating a Shortcut to your phone home screen

The diagram illustrates the process of creating a shortcut to the ATS Smartphone Login page on an iPhone home screen. It consists of three main parts:

- Top Left:** A circular icon representing the shortcut. The icon features the ATS logo (a stylized 'A' with a yellow and green background) and the text "ATS Smartphone Login" below it.
- Top Right:** A screenshot of an iPhone home screen with a red-to-purple gradient background. Several app icons are visible: Photo Booth, Shortcuts, iTunes Store, Tips, Feedback, and Chrome. A white icon labeled "ATSSmartphone" is circled in black, and an arrow points from it to the browser screenshot below.
- Bottom Left:** A screenshot of a mobile browser displaying the ATS Smartphone Login page. The URL in the address bar is "atsusers.com/ATSSmartPhc". The page content includes:
 - The ATS logo and the text "Athletic Trainer System Smartphone Login".
 - A row of small images showing various people in athletic settings.
 - Form fields for "User ID:" (containing "Login ID"), "Password:" (containing "Password"), and "Database:" (containing "atsrhett").
 - A blue "Login" button.
 - A status message: "Number of active users: 5" with a row of small images below it.
 - A message: "1410 days remaining until your activation expires".
 - Contact information: "Call 1-888-328-2577", "Version 1.0.0.0, Copyright © 2021", and "Keffer Development Services, LLC".

Arrows indicate the flow from the icon to the browser page and from the home screen icon to the browser page.

The examples shown are from one android device, and one apple device. The examples are not meant to be all encompassing. Your device should have something very similar to these menu options. KDS/ATS does not have extensive knowledge on this, but we will assist as we are able.
