ATS— Adding an Athlete via the Smartphone

Adding an Athlete:

Should the need arise, you have the ability to add an athlete from your ATS Smartphone link. Remember, in order to log a treatment, modality, rehab or any other feature the must be in the system and be a member of a team.

As a reminder, every athlete must be on a team, if you do not assign them to a team and make them active, they may not show up for you to enter your session for.

To add a new athlete, navigate to the Menu, and select Athlete. You will have the ability to do a regular add, or a quick add of an athlete pg. 2 of the doc.

Doing a regular athlete add will take you to the screen to enter all of the information about that athlete. As other screens, yellow fields are required for data entry. Your portal may appear different depending on the data that your administrator has marked required.

ATS— Adding an Athlete via the Smartphone

Using the quick add of an athlete, will allow you to enter the basic information needed to create that profile for the athlete. You can enter the remainder of the information at a later time.
