

ATS - Color Coding Limitations

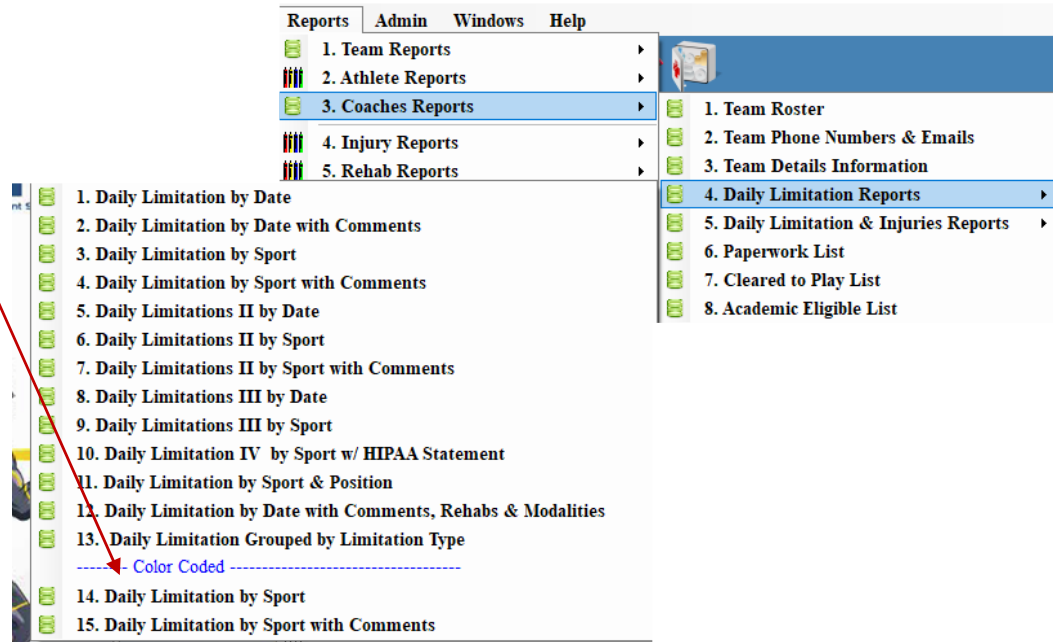

Many of our clients have asked about being able to “color code” practice limitations. An overview of how this is accomplished in ATS is below...

When entering a limitation choose the applicable color

The screenshot shows the 'Limitation - Anderson, Bobby J' window. The 'Color Code' dropdown menu is highlighted with a red box, and a red arrow points to it from the text below. The interface includes fields for Name, Injury, Team, Date (5/8/2018), Practice/Event No (1), Practice Sequence #, Event #, Event Name, Type of Limitation, Game Status, and Comments. There are also buttons for 'Copy X Times', 'Copy to Date Range', 'Add Default Injury', and 'Email Group'. At the bottom, there are 'Actions' buttons: New, Save, Remove, Search, and Close.

This option is available in the ATS Core, Core Portal, Smartphone, or either Quick Med Check modules

Coach's reports designated as “Color Coded” may then be run...

The color codes available include those shown here. This list may be reduced by our staff if requested.

ATS Limitation Colors

| | |
|-----------|----------|
| Red | Lt Blue |
| Purple | Green |
| Lt Purple | Ol Green |
| Blue | Lt Green |
